IT CONSULTING COMPANY

Amari Kai Technology is a certified Minority Business Enterprise (MBE), insured and bonded firm founded in 2012. We provide IT consulting services as well as staff augmentation on a project basis in the area of IT Staffing, IT Project Assessments & Reviews, Quality Assurance Test management and Online Course Platform.

We have the experience and expertise to provide technical solutions as well as training and instruction in Information Technology. With a solid knowledge base in database technology, telecommunications, computer networking, systems evaluation, integration and testing methodology, we offer a tailored array of solutions to our clientele as well as staff augmentation on a project basis.

Amari Kai Technology specializes in providing technical services to the Federal Government and clients in virtually every segment of the financial services industry.

VALUE PROPOSITION

Eddie L. Cason | CEO

Eddie Cason has an extensive scientific research and development background. A former IBMer, Mr. Cason holds a BS in Computer Science and has been responsible for growth across the organization through a series of strategic business initiatives enabled by IT and business partnerships.

Columbus Pressley | SVP, Business Development

Columbus Pressley has been a visionary, results-driven IT professional with remarkable success activated across extensive experience supporting high-profile senior executives within the Federal government, white-shoe law firms in Washington, DC & New York, corporate environments from Wall Street to the lobbying fiefdoms of K Street as well as prestigious institutions of higher learning such as Columbia University & New York University.
